## **TERMS OF SALE**

### **GUARANTEE**

We exercise the greatest care to keep our varieties pure and true to name. However, we can give no warranty, expressed or implied, as to description, quality, growth, productiveness or any other matter of any stock we sell. In case of error, it is mutually agreed that our total liability for untruthfulness to name shall be limited, upon satisfactory proof, to free replacement, or refund of the purchase price.

### **REPLACEMENT**

It is the desire of the FRENCH NURSERY CO. to satisfy every customer, and this has been our policy for NINETY-FIVE YEARS. We guarantee our stock to reach the customer in good condition, and we will replace absolutely free any stock that does not reach the customer in good condition, providing we are notified immediately upon arrival of order, so that we can make claim with transportation company.

If the customer plants his order carefully and gives it good care and still some items fail to grow, we will replace at one-half the current year's price, if the customer notifies us before August 1st, following planting.

1/2" Cal. 3 Feet and Up	----- 1.80	1.40

ORANGE. Fine for jellies, preserves, and Quince Honey.

## PEACH TREES

Peach trees are one of our main items. Our PEACHES are grown on rich sandy soil, which enables us to produce trees, with a wonderful Root system, plenty of Fibre Roots, which are so essential. For the Commercial Planter, we highly recommend the 3-4 ft. 7/16 Caliper, often called the medium grade or orchard size.

				50	100	
				Each	Or More Each	
11-16"	Cal.	5-6	Feet	-----	\$1.20	\$1.00
9-16"	Cal.	4-5	Feet	-----	1.05	.85

We recommend Hale-Haven as being an excellent pollenizer for other varieties.

Note: Opposite each variety you will note their approximate ripening date, as given by the Government Experiment Station at Wooster, Ohio.

### SUNHAVEN AND RICHHAVEN

Two new Peach Varieties introduced by the South Haven Experiment Station in Michigan.

SUNHAVEN — Highly colored, flesh yellow, keeps and handles well and ripens 10 days before Redhaven.

RICHHAVEN — Bright color, ripens with Hale-Haven or 14 days before Elberta.

### FRENCH'S OWN INTRODUCTION.

#### ★ALBRU — U. S. Plant Patent No. 813

We consider Albru the best commercial variety ever introduced in Elberta season. Albru is rapidly replacing Elberta in our locality. We highly recommend ALBRU.

Albru is a sport of J. H. Hale, a large highly colored freestone, ripening in Elberta season. It doesn't have the small "Buttons" or small undeveloped peaches at harvest like J. H. Hale. It bears heavy as Elberta, ships and handles well. Many large growers consider it the best variety in Elberta season. Albru has everything the commercial planter wants — Size, Quality and Color. Albru always commands highest prices.
